

**WE
CAN'T
WAIT**

WORLD LYMPHOMA
AWARENESS DAY

15 September
2021

#WLAD2021

This World Lymphoma Awareness Day, join the global lymphoma community and stand up to say:

We Can't Wait to take care of our own health.

Worldwide, cancer diagnoses have dropped significantly. The lack of in-person care and people being afraid to seek medical attention when they experience symptoms are leaving cases undetected.

If you notice signs or symptoms of lymphoma, do not wait and speak to your healthcare team.

Lymphoma symptoms can be similar to other illnesses, like the flu or Covid-19

- Painless swelling in the lymph nodes
- Chills or temperature swings
- Recurrent fever
- Excessive sweating
- Unexplained weight loss
- Loss of appetite
- Tiredness or general fatigue
- Breathlessness and coughing
- Persistent itch all over the body (without an apparent cause or rash)
- Enlarged tonsils
- Headache
